Our Mission

Totally Kids Rehabilitation Hospital is dedicated to enriching the health and quality of life of children with medical and developmental needs and who benefit from the habilitation and rehabilitation services and the supportive use of technology. We are committed to meeting their medical, physical, developmental, social, psychological and spiritual needs through a blend of tenderness and expertise.

Totally Kids® Rehabilitation Hospital

Newly licensed in June 2014 our acute hospital offers intensive rehabilitation with a customized blend of age and developmentally-appropriate services in a small acute setting of 25 beds. Here we specialize in the care and treatment of children, adolescents, and young adults from 3 to 21 years of age who are recovering from the effects of a complex illness or injury and have potential for recovery and return to Home. Stays are short--usually less than 4 weeks.

Pediatric Subacute Care - Loma Linda

Long-term care and respite services are provided adjacent to our acute hospital for children who are medically fragile and technology-dependent. We are serving children from newborn to age 21 who benefit from specially trained nurses and respiratory therapists. Ongoing therapy is also provided as needed.

Donations

Please make your tax deductible donation in any amount to: [Kids 4 Ever](#) (not-for-profit corporation) EIN 33-0033024; CA C1230270.
